

BENEFITS AT A GLANCE

- Indoor ATM easily deployed in retail environments
- Simple and cost effective end-to-end solution
- Enables a variety of banking, retail and value-added services
- Scalable and easily customized management system

A multi-purpose retail ATM for maximum revenue in minimum space

The NURIT 6000 is a freestanding and compact indoor ATM that provides a variety of banking and retail services. These include cash withdrawal, online access to bank account information, and cash or credit card transactions to purchase prepaid debit cards or services such as mobile phone airtime, e-tickets and shopping vouchers.

Increases Profitability

The NURIT 6000 generates additional retailer revenues through transaction service fees and boosts profits by increasing the proportion and value of cash transactions. The wide range of service offerings and improved customer convenience strengthen customer loyalty, while attracting

new customers and third-party advertising.

Enhances Customer Experience

The NURIT 6000 provides a convenient and familiar interface with loyalty programs to request status reports and upgrades and to receive discount coupons or gift cards. It also supports eye-catching in-store messaging to promote special offers.

Easy To Use

The ATM is easy to install, operate and maintain. It enables simple navigation through intuitive menus, and incorporates features to support use by cardholders with special accessibility requirements.

NURIT 6000 & 6100

ATM & Kiosk Solutions

NURIT 6000 & 6100

The NURIT 6100 is a compact, easy-to-use and reliable kiosk that handles a wide variety of payment and value-added transactions, such as purchasing gift vouchers, theater tickets and prepaid services. Positioned as a countertop, pedestal or wall-mounted unit, it has fully customizable graphical display and secure ergonomic keypad. The NURIT 6100 is the ideal solution for a wide variety of retail environments.

Features & Benefits

Security

- Secure internal PIN pad with Triple DES encryption, designed to comply with stringent security standards, including PCI EPP
- Tamper-responsive hardware and software security mechanisms
- Secure multi-application environment with secure software download
